

Accessing SAS® Software Using the Hands-On Lab for Terminal Servers

To practice what you learn in the course, you can access the SAS software and the course data through the SAS Hands-On Lab for Terminal Servers.

DOCUMENTATION

When you first access a course containing the SAS Hands-On Lab for Terminal Servers you will be asked to read the documentation, check the box that you have read the documentation and submit your acknowledgement that you have read the documentation. When you click on the **Documentation** icon, the documentation will open in a separate browser tab. Please read this document thoroughly, as many commonly asked questions are addressed here.

The hands-on lab is preconfigured to support this course and will not support hands-on practice for all your enrolled courses.

The Documentation icon will always be available, so you can refer to this document whenever you wish.

LAUNCHING THE LAB

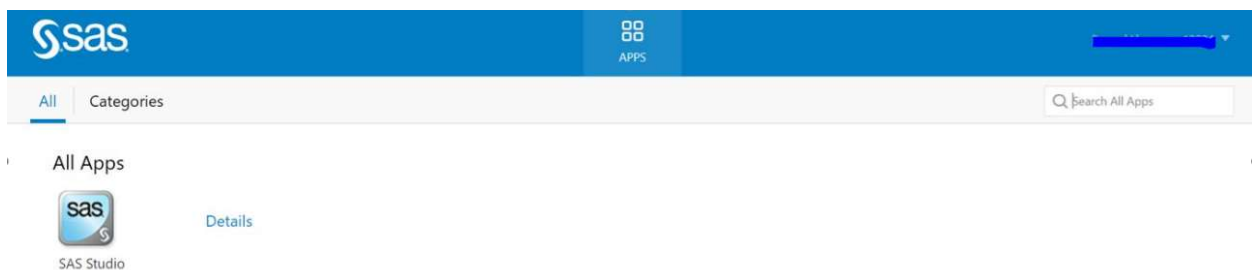

To launch your lab, simply select launch.

The SAS Education Virtual Labs login page will open in a new browser tab. The username and password for your user session is already assigned and pre-filled. Select “Log On”.

A Citrix Receiver window will open containing access to the software needed to complete the practices and demonstrations specific to your course. (screen below shows SAS Studio but your course may use a different software)

ENDING YOUR LAB

When you have completed your lab work, perform the following steps:

1. Select your username in the upper right corner.
2. Select Log off
